PECOS UPDATE

For several months, CMS has posted a list of physicians who are eligible to order and refer in Medicare because they have a complete record in the PECOS enrollment database. Today CMS began posting a separate list of physicians with pending enrollment applications. There are 26,000 doctors on this list.

Optometrists who order or refer items or services for Medicare beneficiaries should confirm that their enrollment information is included in the PECOS repository. If they submitted an enrollment application recently but have not received approval, then check on the new list.
