

Turn your front line staff into your first line of defense in disasters, emergencies, and other threatening events.

When seconds count: emergency team notifications and having the right script are critical to success.

TeleCrisis™ Threat Management Software is uniquely designed for dynamic incident guidance, notification, and reporting. It sits on the desktop, remotely configured and administered by you for proper notification protocols, waiting to be called into action. The Customer Service Reps (CSR), Telephone Service Reps (TSR), lobby/front desk personnel, are your organization's front line staff.

When called into action TeleCrisis offers guidance to your staff in dealing with the incident at hand by providing expertly designed "all-hazards" scripting and instant incident notification. Because, having critical crisis call tools at their fingertips keeps call-takers calm, focused, and engaged during even the most stressful contacts.

TeleCrisis™ is now exclusively available from **Extreme Behavioral Risk Management (XBRM)**, a division of AllSector Technology Inc., specializing in the human factor in emergency management, business continuity, and homeland security.

TeleCrisis™ offers:

- Secure web-based administration management
- Expert driven scripting
- Incident reporting system that dynamically notifies pre-determined responders on an on-going basis during the incident
- Real-time notifications via broadcast voice, email, text, fax
- Post incident reporting based on form and logs
- Seamless integration into the SendTrac® Administration Systems

Please contact us for a no-obligation demonstration of our unique solutions and to discuss how we can help your organization optimize the human factor in business continuity.

Call us at 212-366-8200 or E-mail: info@XBRM.com.
